## Research papers

---

### **Secondary Market for Private Equity and Venture Capital**

Short Abstract: discussing the role of PE and VC secondary markets, the type of assets (trophy or trouble) traded, the information asymmetries, and the pricing challenges

### **Climate Risk and Brand Capital** (*joint work with Giudici, G., Konstantios, D.*)

Short Abstract: we find that the value of a marginal dollar of cash on brand value is significantly lower in firms with high climate risk exposure compared to those with low exposure

### **What's News with You: Price Forecasting and Sentiment Scores** (*joint work with Leone, F., Marazzina, D.*)

Short Abstract: we show that deep learning models (N-HiTS), when trained on sentiment data from news (with sentiment scores computed using RoBERTa), significantly outperform the baseline model in forecasting stock prices

### **Profit or Planet? Both! ESG Drivers of Efficient Portfolios and the Costs of Disclosure**

Short Abstract: customizing a Random Forest algo, I create efficient sustainable portfolios through best-performing firms selection and identify material ESG indicators in 5 global markets

### **No Gambling Here! A New Comprehensive Risk Index**

Short Abstract: I combine financial, macroeconomic, and ESG variables into a synthetic measure representing risk with an unsupervised neural network that overcomes linearity

### **Climate Shocks and Corporate Resilience: Extreme Weather Events and EU Solidarity Funds for Adaptation and Mitigation**

Short Abstract: the effect of various extreme weather events on firms' financial performance is comparable in magnitude. The European solidarity funds help in the first aftermath, not necessarily in resilience for future events

### **Forecasting and Prediction: Bayesian Econometrics and Machine Learning**

Short Abstract: Bayesian updating info and Machine Learning for prediction and forecasting in the equity market

### **Should I Stay or Should I go? Transfers, Trade Gains, and Capital Accumulation in a Fiscal Union**

Short Abstract: the incentive compatibility of the optimal fiscal union model for countries in the European Monetary Union, comparing the trade gains in the currency union with the transfers in the fiscal union

### **Fiscal stimulus for EMU countries not meeting SGP criteria** (*joint work with Cvečić, I., Drezgić, S.*)

Short Abstract: the effects of the 2010 dry-up in the credit supply for Italian non-financial firms on unemployment
