Nico Rosamilia

NYU School of Professional Studies – Tisch Institute for Global Sport

nico.rosamilia@nyu.edu | +1 7543170672 | Personal Website

Academic Appointment

Clinical Assistant Professor, New York University, SPS TIGS 2026–

Research Interests

Macroeconomics, dynamic portfolio construction (public and private markets), private equity in sport.

Education

Ph.D., Management Engineering, Politecnico di Milano School of Management 2025

- Research Grant
  Recipient, EU National Operational Programme on Research and Innovation grant 2021–24
- Visiting Researcher
  ALBA Graduate Business School, The American College of Greece, Athens 2024
  The University of Queensland, Brisbane, Australia 2023

M.A., Economics, CERGE-EI 2021

M.Sc., Management Engineering, Politecnico di Milano 2015

B.Sc., Management Engineering, Università di Napoli Federico II 2013

Publications

AI-Driven ESG Investing: Robust Portfolios with Dynamic Ensemble Learning.
(with I. Ferrari, E. Pariani, and D. Marazzina), *Annals of Operations Research*, 2026.
Develops a Dynamic Ensemble Learning Strategy (DELS) combining adaptive Random Forest classification and volatility-based portfolio recalibration, improving portfolio robustness, ESG alignment, and risk-adjusted performance relative to passive benchmarks for Euro STOXX 600 stocks.

Returns under the Lens: the Importance of ESG Factors.
(with G. Ginestroni and D. Marazzina), *Decisions in Economics and Finance*, 2026.
Shows that ESG and financial variables independently deliver comparable improvements in return classification, suggesting that the two groups provide complementary information for return forecasting.

What's news with you: Price forecasting with global and ESG sentiment scores.
(with F. Leone and D. Marazzina), *Finance Research Open*, 2025, article 100013.
Shows that N-HiTS deep learning models incorporating RoBERTa-based news sentiment scores significantly outperform the baseline model in forecasting stock prices.

Submissions

Profit or Planet? Both! ESG Drivers of Efficient Portfolios and the Costs of Disclosure.
Submitted to *Decisions in Economics and Finance Open*, August 2026. SSRN preprint.
Develops a customized Random Forest approach to construct efficient sustainable portfolios through the selection of best-performing firms and the identification of material ESG indicators across five global markets.

Climate Risk and the Erosion of Brand Capital.
(with G. Giudici and D. Konstantios). Submitted to *Long Range Planning*, April 2026.
Finds that the marginal contribution of cash to brand value is significantly lower among firms with high climate-risk exposure than among firms with low exposure.

Working Papers

Valuation Practice and Theory: Traditional Models and a Jump-Diffusion Framework.
Benchmarks DCF, asset-based valuation, and comparable multiples using M&A, IPO, and venture-capital datasets, alongside a jump-diffusion real-options framework for illiquid assets.

No Gambling Here! A New Comprehensive Risk Index.
Develops a synthetic measure of risk by combining financial, macroeconomic, and ESG variables through an unsupervised neural network, moving beyond linear specifications.

Climate Shocks and Corporate Resilience: Extreme Weather Events and EU Solidarity Funds for Adaptation and Mitigation.
(with R. Qi).
Compares the financial effects of extreme weather events and finds that European solidarity funds support immediate post-event recovery without necessarily strengthening resilience to future events.

Forecasting Stock Returns with Bayesian Econometrics and Machine Learning.
Combines Bayesian updating and machine learning methods to predict and forecast equity-market returns.

Should I Stay or Should I go? Transfers, Trade Gains, and Capital Accumulation in a Fiscal Union.
Examines incentive compatibility in an optimal fiscal-union model for the European Monetary Union, comparing currency-union trade gains with fiscal transfers and their implications for capital accumulation.

Fiscal stimulus for EMU countries not meeting SGP criteria.
(with I. Cvečić and S. Drezgić).
Examines the effects of the 2010 contraction in credit supply to Italian non-financial firms on unemployment.

Secondary Market for Private Equity and Venture Capital.
Examines the role of private-equity and venture-capital secondary markets, focusing on the characteristics of traded assets, information asymmetries, and pricing challenges.

Teaching Experience

Clinical Assistant Professor, NYU 2026–

- Sport Finance and Economics (graduate level)
- Financial Management and Accounting in Sport (undergraduate level)
- Research Methods (undergraduate level)

Lecturer and Teaching Assistant

- Politecnico di Milano GSOM: Corporate Finance, Sustainable Finance and ESG 2021-24
- CERGE-EI: Microeconomics 2020
- University of Rijeka: EU and fiscal policy 2018-19

Academic Service

Committee Member, Tisch Institute Strategic Pathways Committee, NYU SPS 2026–

Support undergraduate curriculum development, academic and career pathway design, and connections among coursework, industry engagement, and professional opportunities.

Faculty Advisor, Graduate Sport Business Society (GSBS), NYU SPS 2026–

Advise student leadership on professional development, networking events, club programming, and organizational governance.

Research Appointments

Researcher, European Regional Development Fund 2021–24

Developed quantitative machine-learning models for risk measurement and examined EU solidarity-fund effects following extreme weather events.

Researcher, University of Rijeka, Croatia 2018–19

Modeled fiscal unions with limited-commitment frictions, state-contingent EU transfers, and capital-accumulation incentives; examined fiscal stimulus, SGP compliance, and labor-market effects of credit shocks. Academic references: S. Drezgić and I. Cvečić.

Professional Experience

Economist (Portfolio Manager and Investment Strategist), Bulltick, Miami, USA 2025

- Portfolio management: managed $500 million in public-market portfolios; investment strategy responsibilities covering $4 billion.
- Developed cross-asset approaches using time-varying transition probability (TVTP) Markov-switching forecasts; machine-learning optimization with sentiment inputs; and top-down/bottom-up validation of beta-hedged market-neutral portfolios.
- Alternative assets and derivatives: five-year commitment-pacing and liquidity scenarios, J-curve and PME/KS-PME analysis, directional options, delta hedging, and volatility-driven positioning.

Investment Manager, GMA International Services, Inc., Fort Lauderdale, USA 2024–25

- Valued illiquid M&A targets using jump-diffusion real-options analysis alongside DCF and comparable-company approaches.
- Constructed equity allocations using GDP-lag and volatility regimes with beta-neutral hedges.
- Managed income-producing residential properties in Italy for La Promessa.

External Associate, Intellico, Italy 2021–24

Identified material ESG drivers for Italian companies using LASSO and ensemble trees in Python; developed AI-enabled decision-support applications for finance and insurance. Related article: AI and ESG.

AMBassadors for sustainable transITION, Kenya and the Netherlands 2023–24

Developed sustainable-finance transition practices in schools and companies across Africa and Europe. AMBITION program website.

Consultant, IMI Investment Banking – Be Shaping the Future, Italy 2015–16

Supported trading-desk analytics, market-data workflows and infrastructure, and trading-platform implementation.

Conference Participation

- XXXIV AiIG – Humanizing Technologies for a Better Society
- IAFDS – International Accounting & Finance Doctoral Symposium (2022 and 2023)
- ICEE – Tenth Italian Congress of Econometrics and Empirical Economics
- EEA–ESEM – 37th European Economic Association and 74th European Econometric Society Meetings
- XXXIII AiIG – Redesigning Networks and Supply Chains in Times of Transition
- DIGITOMICS – International Scientific Conference Economics of Digital Transformation

Additional Academic and Professional Development

- *Macroeconomic Forecasting and Analysis in the Machine Learning Era*, Bank of Italy.
- *Advanced Bayesian Econometrics: Bayesian Multivariate Models and Forecasting*, Università Ca' Foscari.
- *Panel Data Econometrics: Theory and Applications*, Università di Bologna.
- *Striving for Research Quality*, Alma Mater Studiorum Bologna.
- *Knowledge Dynamics, Industry Evolution, Economic Development*, Université Cote D'Azure.
- *It's Not About Teaching, It's About Learning*, Università degli Studi di Bergamo.

Professional Memberships and Training

- Member, European Economic Association.
- Member, AiIG – Italian Association of Management Engineering.
- Canadian Securities Institute; Moody's Analytics Training Certification Services (securities and mutual-fund transaction regulatory requirements, as described in the original CV).
- Trading and Portfolio Management: asset returns, OHLC, implied volatility; foreign-exchange regimes and infrastructure; directional-options strategies and options-positioning analysis.

Technical Skills and Languages

Programming: Python, R, MATLAB, Stata, Microsoft Office, LaTeX.

Trading platforms: Bloomberg, Interactive Brokers.

Languages: English, Italian, Spanish.

Interests

Aperitivo (Italy's finest networking format), tennis (4.5 USTA), soccer (Avellino), avid reader, TV shows binge-watcher (*"It's All Good Man"*), dry wit and unconventional humor.
