

Nico Rosamilia

🌐 *Personal website* — ✉️ nico.rosamilia@polimi.it — 📞 +1 7543170672 — 📠 +39 3277321668

Possesses a strong aptitude for analysis, modeling, and critical thinking, combined with a passion for teaching and mentoring. Efficiently communicates concepts orally and in writing, values industry partnerships and advising students.
Research interests: corporate finance, capital structure, valuation, asset management, asset pricing, sports finance

Assistant Professor, *NYU School of Professional Studies Tisch Institute* August, 2026

Ph.D. in Finance, *Politecnico di Milano School of Management* 2025

Awards

Recipient of the EU grant *National Operational Programme on Research and Innovation* 2021/24

Visiting Researcher

ALBA Graduate Business School, The American College of Greece Athens, GR – 2024
University of Queensland Brisbane, AU – 2023

References

Professor *Saša Drezgić*, University of Rijeka Professor *Giancarlo Giudici*, Politecnico di Milano SoM
Professor *Paolo Zacchia*, CERGE-EI Professor *Gina Antonello*, NYU

Teaching and Mentoring

Finance and Economics, Grad, NYU NYC, US – August 2026

Financial Management & accounting, Undergrad, NYU NYC, US – August 2026

Research Methods, Undergrad, NYU NYC, US – August 2026

Corporate Finance, with Giudici, G. (grad), Politecnico di Milano Milan, IT – 2021/24

Graduate Student Supervisor, Politecnico di Milano Milan, IT – 2021/24

- Department of Mathematics: guiding research topics, methodologies, and timelines. Manage the progress of students' work, offer feedback, and assist in preparing thesis documents (joint with *Daniele Marazzina*)
- Department of Management Engineering: mentoring and supervising master thesis students, creating research ideas, and implementing empirical strategies

Business Administration and ESG, Lecturer, Graduate School of Management, MBAs Milan, IT – 2021/24

Sustainable Finance, Case Studies, Unicredit Bank employees Turin, IT – 2021/24

Microeconomics, TA, CERGE-EI Prague, CZ – 2020/21

Economics and Policy of Investments, with Drezgić, S., University of Rijeka Rijeka, HR – 2018/20

Economics and International Trade Policy, with Cvečić, I., University of Rijeka Rijeka, HR – 2018/19

Education

M.A. in Economics, *CERGE-EI*, Chartered by The University of the State of New York Prague, CZ – 2019/21

Researcher, University of Rijeka, References: Drezgić, S., Cvečić, I., Blažić, H. Rijeka, HR – 2018/19

M.Sc. in Management Engineering, Politecnico di Milano Milan, IT – 2013/15

B.Sc. in Management Engineering, Università di Napoli Federico II Naples, IT – 2010/13

Publications and Submissions

What's news with you: Price forecasting with global and ESG sentiment scores (joint work with Leone, F., Marazzina, D.) Published in: Finance Research Open, 2025, 100013

We show that deep learning models (N-HITS), when trained on sentiment data from news (with sentiment scores computed using RoBERTa), significantly outperform the baseline model in forecasting stock prices

Profit or Planet? Both! ESG Drivers of Efficient Portfolios and the Costs of Disclosure. Status: submitted to Finance Research Open in March 2026. Available at SSRN: [link1](#). Last revised: 10 Feb 2026

Customizing a Random Forest algorithm, I create efficient sustainable portfolios through best-performing firms selection and identify material ESG indicators in 5 global markets

Climate Risk and the Erosion of Brand Capital (joint work with Giudici, G., Konstantios, D.). Status: submitted to Long Range Planning in April 2026

We find that the value of a marginal dollar of cash on brand value is significantly lower in firms with high climate risk exposure compared to those with low exposure

Returns under the Lens: the Importance of ESG Factors (joint work with Ginestroni, G., Marazzina, D.). Status: review and resubmit in *Decisions in Economics and Finance*

Our results show that ESG and financial variables independently improve classification performance comparably, suggesting a complementary role in return forecasting.

AI-Driven ESG Investing: Robust Portfolios with Dynamic Ensemble Learning (joint work with Ferrari, I., Pariani, E., Marazzina, D.). Status: RR in *Decisions in Economics and Finance*

We introduce the Dynamic Ensemble Learning Strategy (DELS), ensuring an adaptive decision-making process based on a two-stage consensus mechanism, optimizing risk-adjusted returns while aligning with sustainability objectives.

Working papers

Valuation Practice and Theory: Traditional Models and a Jump-Diffusion Framework

Benchmarking traditional valuation models (DCF, Asset-Based, and Comparable Multiples) on M&A, IPO, and VC datasets with a jump-diffusion real-options framework for illiquid assets.

No Gambling Here! A New Comprehensive Risk Index

I combine financial, macroeconomic, and ESG variables into a synthetic measure representing risk with an unsupervised neural network that overcomes linearity

Climate Shocks and Corporate Resilience: Extreme Weather Events and EU Solidarity Funds for Adaptation and Mitigation (joint work with Qi, R.)

The effect of various extreme weather events on firms' financial performance is comparable in magnitude. The European solidarity funds help in the first aftermath, not necessarily in resilience for future events

Forecasting Stock Returns with Bayesian Econometrics and Machine Learning

Bayesian updating info and Machine Learning for prediction and forecasting in the equity market

Should I Stay or Should I go? Transfers, Trade Gains, and Capital Accumulation in a Fiscal Union

The incentive compatibility of the optimal fiscal union model for countries in the European Monetary Union, comparing the trade gains in the currency union with the transfers in the fiscal union

Fiscal stimulus for EMU countries not meeting SGP criteria (joint work with Cvečić, I., Drezgić, S.)

The effects of the 2010 dry-up in the credit supply for Italian non-financial firms on unemployment

Secondary Market for Private Equity and Venture Capital

Discussing the role of PE and VC secondary markets, the type of assets (trophy or trouble) traded, the information asymmetries, and the pricing challenges

Courses

Macroeconomic Forecasting and Analysis in the Machine Learning Era, Bank of Italy

Advanced Bayesian Econometrics: Bayesian Multivariate Models and Forecasting, Università Ca' Foscari

Panel Data Econometrics: Theory and Applications, Università di Bologna

Striving for Research Quality, Alma Mater Studiorum Bologna

Knowledge Dynamics, Industry Evolution, Economic Development, Université Cote D'Azur

It's Not About Teaching, It's About Learning, Università degli Studi di Bergamo

Experience

Portfolio Manager and Investment Strategist, *Bulltick*

Miami, FL, US – 2025

- **Portfolio management:** managing **\$500M** in the Public Markets Portfolios division for UHNWI and institutional clients, and serving as Investment Strategist overseeing **\$4B** in institutional assets within the Sales & Trading division. Built liquidity and cash flows budgeting via navigator tools for alternative assets with J-curve scenarios
- **Portfolio strategies:** three self-developed cross-asset allocation approaches: two quantitative models (i) TVTP Markov switching forecasting and (ii) *custom machine learning* optimization with a *sentiment* component; and a more traditional (iii) top-down and bottom-up cross-validation for β -hedged market neutral portfolios
- **Trade generation:** directional options strategies, delta hedging, and volatility-driven positioning to dynamically adjust exposures and exploit short-term dislocations, balancing long-term stability and short-term alpha through a core-tactical structure

Investment Manager, *GMA International Services, Inc.*

Fort Lauderdale, FL, US – 2024/25

- **M&A valuation:** insourced M&A valuation for **20+** targets; cut fees $\sim$ **40%** and **4x** pipeline throughput
- **Equity research:** factor-informed bottom-up (growth, value, quality, momentum) combined with macro fundamental layer

- **Portfolio management:** sector allocation using GDP-lag/vol regimes with β -neutral hedges. Proposed 5-year commitment pacing plan in alternative assets diversification with PME/KS-PME analytics
- **Real estate:** managed income-producing residential properties in Italy for *La Promessa*

Consultant, IMI Corporate & Investment Banking – Be Shaping the Future

Milan, IT – 2015/16

- **Investment banking:** delivered valuation analysis and sector reports backed by 3-statement, DCF, comparative methods, and LBO modeling; collaborated with Sales to turn insights into actionable ideas for institutional clients
- **Equity research:** produced equity strategy briefs (bottom-up/price-action overlay) used by traders

Professional Appointments During Full-Time Ph.D.

External Associate, Intellico

Milan, IT – 2021/24

- **Research-driven applications:** defined ESG material drivers for Italian companies using LASSO and ensemble trees on Python. AI-enabled solutions for decision-making in finance and insurance. Article: *AI and ESG*

Researcher, European Regional Development Fund (NOPRI)

EU & Italy – 2021/24

- **Quantitative models:** *machine learning* for risk measurement and the *EU solidarity fund* effects for extreme weather events

AMBassadors for sustainable transITION, AMBITION

Kenya & the Netherlands – 2023/24

- **Change management:** developed sustainable finance transition practices in schools and companies across Africa and Europe

Professional experience

Member of the European Economic Association

Member of the AiIG – Italian Association of Management Engineering

Canadian Securities Institute, Moody's Analytics Training Certification Services

Regulatory requirements to perform securities and mutual fund transactions in many financial services positions

Trading and Portfolio Management

Asset returns, OHLC, and implied volatility. Forex market infrastructure, fixed, floating, managed (dirty) float regimes. Directional options trading strategies and usefulness filtering. Marginal benefits of options positioning

International conferences

2023

- XXXIV AiIG – Humanizing technologies for a better society
- IAFDS – International Accounting & Finance Doctoral Symposium
- ICEE – Tenth Italian Congress of Econometrics and Empirical Economics

2022

- EEA-ESEM – 37th European Economic Association and 74th European Econometric Society meetings
- XXXIII AiIG – Redesigning networks and supply chains in times of transition
- IAFDS – International Accounting & Finance Doctoral Symposium

2019

- DIGITOMICS – International Scientific Conference Economics of Digital Transformation

Academic Skills

- Faculty and student mentorship with an emphasis on team development and academic leadership
- Proficiency in statistical testing and advanced econometric methods, tailored for applied research and instruction
- Expertise in quantitative analysis with a focus on practical interpretation and academic rigor
- Curriculum design and enhancement of academic programs in finance and related disciplines
- Development of academic-industry partnerships and collaborative research opportunities
- Effective course planning, independent project management, and multitasking in dynamic academic environments
- Strategic communication for academic publishing and conference presentations
- Analytical problem-solving and academic decision-making aligned with educational objectives
- Continuous process improvement in teaching methodologies, using student feedback and evaluation
- Cross-disciplinary collaboration and active engagement with academic and industry stakeholders
- Research project management and academic publication planning, from initial proposal to dissemination

Programming languages

Python, R, Matlab, Stata, Office, LaTeX. Electronic trading platforms (Bloomberg, Interactive Brokers)

Languages

English, Italian, Spanish
Croatian: Basic

Volunteer experience

ACR, Association for children and teenagers organizing social events and charity initiatives

2005/10
